

**WE DELIVER  
BEYOND EXPECTATIONS**

***City Zone Express***  
Group of Companies

# About Us

Established in 2006

Over 550+ Employees, Leading  
Regional Player

Expand to 340 Fleets covering SEA  
and China

Goal: Top 3 cross border provider  
in SEA and China

Innovative Security & Anti  
Hijacking Fleet Operations

Operating in 6 different countries

Bonded & Non-Bonded Services  
Across all Countries

- Established in 2006, CZE has been family-owned organization started with their business with small number of trucks and today has grown to become a leading regional player in the logistics arena. As of today, the group has a workforce of more than 550+ and with strength of more than 340 fleets targeting to be top three Cross-Border service provider in SouthEast Asia and China. By operating our own fleet with GPS equipped with innovative security gadgets and anti hijacking system, we are able to achieve our commitment as per our tagline
- ***"We Deliver ~ Beyond Expectation"***.

# Milestones, Achievements and Growth

- ✓ Presence in **S.E.A** and **China** with total headcounts of 550+
- ✓ **Fleet Size of 340** with Various Sizes in S.E.A and China. In Malaysia our strength is 210 trucks as of 31<sup>st</sup> Dec 2023. **Largest operator in Northern region of Malaysia.**
- ✓ Operating total **1,140,000 sq. feet of warehouse** at the presence in Malaysia.
- ✓ **ISO , TAPA , MATRADE Mid-Tier Programme Award , Authorised Economic Operator (AEO) & ASEAN Custom Transit System (ACTS)** recognised.
- ✓ First Malaysian Company to launch full trucking via land from Malaysia to Europe besides regular trucking operations in active from China / Hong Kong to S.E.A for past 7 years. (FTL / LTL)
- ✓ **Unique in-house TMS system** that able to integrate (API / EDI) with Client system. Real Time Tracking from order receiving until delivery with real time updates with POD and invoicing.
- ✓ **WMS system** that able to integrate (API / EDI) with Client System. We are able to customise based on client requirements.

\*360 Degrees Camera View

# Driver Fatigue Monitoring System

To detect driver fatigue and distraction, and to alert the driver and the fleet management center.

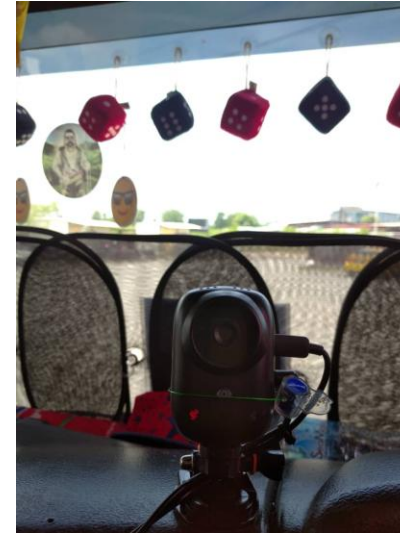

Infrared camera continuously monitors the operator for eyelid closure, facial and head movements, and other unsafe behavior (cell phone use, reading, yawning, speeding events and etc.) while the vehicle is in motion.

Driver drowsiness detection connects with a vibration cushion. When system detects a driver in drowsiness status, it will provide warning alerts and output signals to vibration cushion to shake awake the driver.

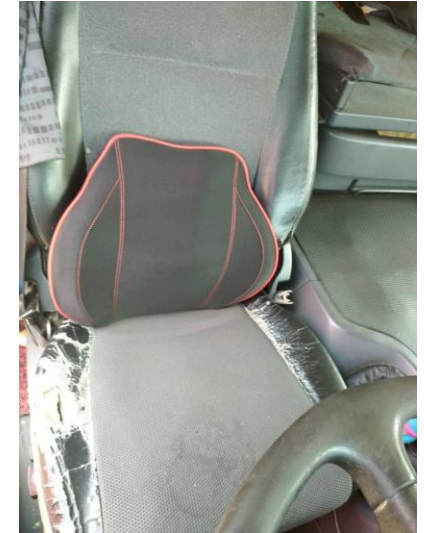

Control Tower immediately call the driver to stop the truck

This issues early warning when fatigue occurs to protect life and property

## ACTS (Asean Custom Transit Systems) CZE Exclusive appointment by Royal Custom

### Making Trade Easier

ACTS is based on a secure and resilient online network that links all Customs offices on the transit route with Customs offices at the points of departure and destination.

#### Benefiting Traders

Qualified traders can make a single electronic goods declaration, which is valid at all entry and exit points of all ASEAN borders for Customs formalities. It also provides traders with real-time ACTS movement information. A single declaration and common risk management protocols provides qualified traders with simplified procedures, and maximizes efficiency for legitimate trade. The system reduces paperwork and minimizes truck idling time, which benefit the business environment and operations.

#### Benefiting Customs Offices

ACTS allows Customs offices to identify irregularities quickly, and manage movements and guarantees efficiently. This means Customs officials can target illegal activities and smuggled goods more effectively, enhancing consumer safety.

#### Benefiting Transporters and Drivers

In addition, mutual recognition by Member States of transport documents, including vehicle inspection certificates and driving licences, results in minimal movement restrictions on approved trucks or drivers.

Businesses, governments and consumers all benefit.

### Enhancing ASEAN Connectivity

ACTS is available along a North-South corridor through Thailand, Malaysia and Singapore, and an East-West corridor through Cambodia, Lao PDR, Myanmar and Vietnam. There are plans to expand the use of ACTS to Brunei, Indonesia and the Philippines, according to business needs.

### Further Information

A dedicated portal provides access to all ACTS-related information. It includes:

- A comprehensive guide for traders to access the system and make declarations to ACTS.
- Information on how to contact the ACTS national and regional helpdesks.
- Details of the documents and relevant legal agreements that make ACTS work.
- A set of Frequently Asked Questions.

Visit <https://acts.asean.org> for more information.

ACTS is supported by the European Union through the ASEAN Regional Integration Support from the EU (ARISE Plus).

ACTS | ASEAN CUSTOMS TRANSIT SYSTEM

## ASEAN Customs Transit System

Accelerating Trade

# CZE Special Certifications & Affiliations

## The ASEAN Customs Transit System

### Accelerating Trade

The ASEAN Customs Transit System (ACTS) makes it quicker and easier to move goods across the borders of ASEAN Member States. This will help drive economic growth and benefit everyone living in the region.

Customs transit - the movement of commercial goods across national borders - is one of the key aims of ASEAN integration, and is vital to the growth and prosperity of ASEAN businesses.

ACTS, which allows cross-border traders and Customs brokers to make a single electronic Customs declaration, enables goods to move more freely from the point of departure through transit to the point of destination. ACTS enables this by temporarily suspending import duties and taxes, which simplifies and speeds Customs clearance formalities.

### Driving economic growth

The establishment of the ASEAN Economic Community (AEC) in 2015 was a milestone in regional economic integration, offering the opportunities of a huge market of US\$3 trillion and over 622 million people.

The AEC Blueprint 2025 aims to increase integration, cohesion, competition, innovation and connectivity across the 10 ASEAN Member States, and improve integration with the global economy. ACTS supports these objectives.

For the AEC to succeed, ASEAN needs a Customs and trading environment that allows goods to move more freely across national borders. This will enhance the region's trade and production networks, establish a more unified market for businesses and consumers, and catalyse greater people-to-people, institutional and infrastructure connectivity.

## ACTS in Action

### Authorised Traders

All traders are eligible to use ACTS to transport goods across borders but must be registered as transit traders with the Customs Administrations of participating Member States. They include:

- Importers and exporters
- Freight forwarders
- Transporters and sub-contractors
- Customs agents.

Recognised reliable traders can apply to be approved as Authorised Transit Traders (ATT), with enhanced privileges that include permission to start transit movements from their own premises at departure, and to deliver to their own premises at destination. National competent authorities determine the qualifying criteria for traders in their countries for departure and/or destination.

### ACTS Objectives

- Increase the efficiency of moving goods across land transport routes.
- Reduce transaction costs and movement time for the trading community.
- Improve the prevention and detection of smuggling and fraud.

## The Legal Basis

The legal basis for the implementation of ACTS is the 1998 ASEAN Framework Agreement on Facilitation of Goods in Transit (AFAFGIT) and its supporting Protocols. Protocol 7 is the basis for the Customs procedures and requirements of ACTS. The objective of AFAFGIT is to create an environment in which a vehicle operating under the transit system can move goods by road from a point of departure in any ASEAN Member State to a point of destination in any other Member State via any number of transit countries with minimal procedures at borders.

## Reliable Guarantees

ACTS is supported by a flexible and secure guarantee based on actual consignment values and levels of risk, which may be waived or reduced for Authorised Transit Traders as approved by Customs Authorities in each country. A single guarantee taken out at departure covers the transit movement from start to finish. ACTS provides Customs with an effective environment for managing guarantees.

## AEO (Authorized Economic Operator)

## Authorized Economic Operator Programme

### What is an AE O in Malaysia?

An economic operator is a person who, in the course of their business, is involved in activities covered by customs legislation. An authorised economic operator (AEO) is defined as an economic operator who is reliable/compliant in the context of their customs related operations, and therefore, is entitled to enjoy benefits provided in the AEO Programme.

### What are the benefits?

#### 2.1 The Authorized Economic Trader :

- is required to submit electronically minimum data in the form of Permission Request Slip (PRS) for customs clearance;
- is not subject to physical inspection (except on specific reason) on his cargo i.e customs release via green lane, for import, export and bond-to-bond movement;
- is required to submit electronically a periodic self-assessment declaration on import/export/movement known as the Consolidated Statement (CS), based on specified schedules.
- is allowed deferred duty payments via electronic Fund Transfer (EFT) done periodically with the CS;
- is allowed to use the Consolidated Statement (CS) to apply for the Certificate of Origin (Form D) from the Ministry of International Trade and Industries;
- is entitled to the benefits offered by international customs administrations under Mutual Recognition Arrangements (MRA) with RMCD.

2.2 Licensed Manufacturer Warehouses certified as AEOs are not required to submit the Monthly Statement on Movement of Raw Materials (M1) and Statement of Finished Product (M2);
